

## JEOHUNTER 3D DUAL SYSTEM AIR TESTING

GENERAL SEARCH COIL	Target Diameter (New Metal) (cm)	Depth (cm)
	5cm x 5cm	56 cm
	10cm x 10cm	75 cm
	20cm x 20cm	110 cm
	30cm x 30cm	132 cm
	40cm x 40cm	154 cm
	50cm x 50cm	176 cm
	60cm x 60cm	189 cm

DEEP SEARCH COIL	Target Diameter (New Metal) (cm)	Depth (cm)
	5cm x 5cm	56 cm
	10cm x 10cm	96 cm
	20cm x 20cm	154 cm
	30cm x 30cm	185 cm
	40cm x 40cm	226 cm
	50cm x 50cm	260 cm
	60cm x 60cm	292 cm

SURFACE DETECTION COIL	Target Diameter (New Metal) (cm)	Depth (cm)
	Coin (16.50 mm)	23 cm
	Coin (20.50 mm)	27 cm
	Coin (26.15 mm)	33 cm
	5cm x 5cm	50 cm
	20cm x 20cm	95 cm
	40cm x 40cm	120 cm
	60cm x 60cm	155 cm

*The values above have been established by trying new metals with no magnetic fields and effects formed yet.*

*As the metal size grows, the rates given in the table also increase.*

*The metals act as a transmitter after they remain underground during years due to the magnetic field created.*

*These magnetic effects enable the search coil to detect values of the target up to **3 to 4 times deeper** from the values in the above.*
