

SABRE®

“The Most Potent Defense Spray”

Got Stopping Power? Independent laboratory testing confirms SABRE RED measures 8 to 86% hotter than the competition. **Capsaicinoids** are the only accepted indicator of pepper spray strength by the U.S. Federal Government. They bring heat to your defense spray which means the higher the better and more stopping power when it counts.

SABRE products are guaranteed to provide the most consistent heat level and highest quality defense spray in the industry. Our most popular HC-14 adds CS Military Tear Gas and UV Marking Dye for **Advanced 3-In-1 Maximum Stopping Power!**

SABRE®

Making Grown Men Cry Since 1975!
